

Degree Requirements

To earn a bachelor's degree (Bachelor of Arts or Bachelor of Science), a student must:

- Complete 32 full academic courses (equal to 128 semester hours), plus two physical education credits;
- Earn one PE credit by the end of the freshman year and an additional one by the end of the sophomore year¹;
- Meet the general education requirements of the college before the beginning of the senior year^{2,3};
- Of the 32 academic full courses (128 semester hours) presented for a bachelor's degree, no more than 13 full courses (52 semester hours) may be presented in any single subject. Students and their advisors are strongly encouraged to develop a program of study for the junior and senior year that reflects breadth of involvement in disciplines beyond their principal academic interest;
- Complete an academic major;
- Attain a grade point average of at least 2.00 on all academic work at Sewanee;
- Spend at least four semesters in residence, including the final two semesters;
- Earn a minimum of 64 semester hours of credit at Sewanee.

During the first two years, many of the student's courses are options listed within prescribed categories of general education. During the last two years, a student's courses are usually selected from those offered in a major field of study but also include ample electives.

The college offers a broad undergraduate education in the arts and sciences rather than highly specialized training. Toward this end, and to fulfill the aims suggested by the fourth bulleted item above, no major is allowed to require more than 11 courses in the major field. During the final year, each student is required to pass a comprehensive examination in the major field before graduation. A student who at the time of the comprehensive examination does not have at least a 2.00 grade point average is not allowed to take the exam until the grade point average has been raised to that required level.

¹ Exceptions may be made by petition to the College Standards Committee. A student must request and receive College Standards Committee approval to meet any general education requirement outside the time frame specified.

² General education courses must be taken and passed in the College of Arts and Sciences by all except transfer students. Only coursework taken by these students prior to admission to the college may be evaluated as possible substitutions for prescribed courses.

³ Without specific approval from the Office of the Dean of the College, a student may not complete a general education requirement with an Independent Study (444) course or courses. The only exception is physical education in which 444 does count.

Additional Requirements for a Bachelor of Science

In addition to satisfying all requirements for the Bachelor of Arts degree, a candidate for the Bachelor of Science degree must:

- Complete a major in biochemistry, biology, chemistry, computer science, ecology and biodiversity, forestry, geology, mathematics, natural resources and the environment, physics, or psychology;
- Present four courses outside the major field from biology, chemistry, computer science, geology, mathematics, physics, statistics, or those courses in forestry and psychology designated as meeting the general education requirement for observing, experimenting and modeling.
- At least two of the four courses must be laboratory courses, all four must be taken at Sewanee, and none may be graded on a pass/fail basis.
